

Mansi Shah

Senior .NET Developer (C#, ASP.NET Core, SQL Server)

UK (Remote/Hybrid) | shah.mansi49@gmail.com | 07823722731 | <https://www.linkedin.com/in/mansi-shah-8631b2223/>

PROFESSIONAL SUMMARY

Experienced .NET Developer with 10+ years of expertise building internal business systems, admin panels, and data-driven enterprise applications using C#, ASP.NET Core, and SQL Server.

Specialised in developing CRUD-based systems, user management modules, role-based access control, and backend APIs for internal operations. Strong background in HRMS and ERP platforms, supporting complex workflows such as payroll, attendance, and employee lifecycle management.

Proven ability to deliver pragmatic, maintainable solutions in small teams, with a focus on performance, reliability, and clean architecture.

TECHNICAL SKILLS

- **Backend:** C#, ASP.NET Core, Web API
 - **Database:** SQL Server (Stored Procedures, CTEs, Query Optimization)
 - **Architecture:** REST APIs, Data-driven systems, System integrations
 - **Frontend:** Basic React, JavaScript, HTML/CSS
 - **Tools:** Visual Studio, Git, IIS
 - **Cloud/DevOps:** Azure App Services, CI/CD (Azure DevOps)
-

PROFESSIONAL EXPERIENCE

Senior Full Stack Developer

Nasan Medical Electronics Pvt Ltd | Nov 2018 – Present

- Developed and maintained internal HRMS and ERP systems used by operations teams
- Developed and maintained internal admin panels for HRMS and payroll systems, integrating with external APIs to streamline data processing and improve operational efficiency
- Implemented **role-based access control (RBAC)** and user management systems
- Designed and developed **RESTful APIs** for internal system integration and data synchronization
- Worked extensively with **SQL Server**, writing complex queries, stored procedures, and optimizing performance
- Delivered solutions for **data-heavy workflows**, including reporting and audit tracking

Key Contributions:

- Built end-to-end **employee lifecycle management system** (joining → confirmation → exit)
 - Developed **dynamic configuration-driven forms** for flexible business processes
 - Implemented **offline-to-online data sync system** for branch-level data collection
 - Solved production issues including performance bottlenecks and database optimization
 - Led small team, ensuring clean and maintainable code delivery
-

Software Developer

Extreme Digital Solutions Pvt Ltd

- Developed backend systems for client-driven business workflows
 - Built configurable admin tools and data-driven modules
 - Worked on integration requirements and structured datasets
-

PROJECT HIGHLIGHT

Employee Management API (GitHub)

- Built ASP.NET Core Web API with full CRUD operations
 - Implemented database integration using Entity Framework Core
 - Designed clean structure suitable for admin/system management use cases
-

KEY EXPERIENCE ALIGNMENT

- ✓Internal/Admin systems (HRMS, ERP)
 - ✓CRUD-heavy applications
 - ✓User roles & access control
 - ✓SQL Server & data modelling
 - ✓API integrations & backend systems
 - ✓Small team, pragmatic delivery
-

CERTIFICATIONS

Microsoft Azure Fundamentals (AZ-900) – In Progress

STRENGTHS

- Strong backend and data-handling expertise
- Experience building real-world internal tools
- Quick problem-solving in production environments
- Ability to work independently in remote setups
